Delays in reform 'blueprint' put rural health at risk

People in rural and remote areas are concerned that specific improvements in rural and remote health might be put on hold pending agreement by the Commonwealth and States about their respective roles and responsibilities in the wider reform picture.

National Rural Health Alliance E-News November 2009

NRHA annual meetings

The Alliance held its annual face-to-face meeting in Canberra from 13-17 November 2009. Council used this opportunity to promote the interests of people in rural and remote areas to Parliamentarians and the media.

Thank you to all who provided feedback to the Alliance through the Health Reform section of the website. The feedback was valuable in helping Council form views to take to Parliament on Monday 16 November 2009.

The Alliance's AGM was also held during this time. Jenny May was re-elected as Chair for another year and a new Board appointed, with some Board members re-elected plus some

new blood.

Policy work

Intensive policy discussions at CouncilFest emphasised the desirability of the Commonwealth assuming responsibility for public primary care; full equivalence funding to underserved areas, based on making up the whole of the rural and remote health deficit (not just the GP Medicare deficit); the establishment of regional primary healthcare organisations - with the regions defined so as to be 'fit for purpose' for individual areas; and the allocation of new money for the roll-out of integrated health services.

Many of the principles of the successful Multipurpose Service (MPS) scheme were identified as important in service development for rural hubs in catchment centres where integrated primary, acute and aged care is justified by demographic and geographic considerations.

The face-to-face meeting also gave close attention to workforce issues; patients' assisted travel schemes; oral and mental health; maternity services; and the desirability of a national rural health plan to tie together the rural and remote aspects of existing developments and reform directions.

Since CouncilFest the Alliance has attended a consultation with Minister Roxon on the primary care aspects of the reform agenda, and is monitoring developments with national registration of ten health professions and the initiatives to enable nurse practitioners and midwives in certain circumstances to access the MBS and PBS.

"From creative ageing to the end-of-life in rural and remote Australia" The proceedings of the Public Seminar held on 17 November 2009 are now available on the Alliance website. There is a link to YouTube for the presentations of our guest speakers from overseas, the CEOs of Carers Australia, Frontier Services and Palliative Care Australia, and Jenny May.

RAMUS Applications

The 2010 application round for the Rural Australia Medical Undergraduate Scholarship (RAMUS) Scheme is now open for applications from students with a rural background interested in studying medicine. Details are available and applications can be made at the RAMUS page of the website: <http://nrha.ruralhealth.org.au/scholarships>

Partyline

The next edition of Partyline will be in the post shortly. Previous editions can be accessed on the Partyline page of the website. If you would like to contribute to the next edition (article, photo, letter to the editor, poem) please contact the Editor at partyline@ruralhealth.org.au

Australian Journal of Rural Health

Issue 17(6) of the Australian Journal of Rural Health is now available to subscribers online and in hard copy. There are original peer-reviewed articles on emergency department performance; psychological screening of newly diagnosed rural cancer patients; prevention of osteoporosis post minimal trauma fracture; oncology services; promoting positive coping skills for rural youth; and an Editorial on small rural emergency departments. Access AJRH online at: <http://www3.interscience.wiley.com/journal/118489045/home>

'Rural and Remote Health Papers 1991-2009'

The updated CD 'Rural and Remote Health Papers 1991-2009' will soon be available free to

all friends of the Alliance. Make sure your membership is up-to-date to receive your copy.

A membership form is available on the friends page of the Alliance's website.

Call for funding applications - Health and Hospitals Fund - Regional Cancer Centres Initiative

In the 2009-10 Budget, the Australian Government committed \$2 billion to build a world-class cancer care system. Included in this investment is \$1.3 billion over six years from the Health and Hospitals Fund towards infrastructure and support, essential to providing better cancer treatment and access to care, including for patients in rural, regional and remote Australia. This investment includes funding of \$560 million over five years to build a network of best practice regional cancer centres.

On 14 November 2009, the Government advertised an Invitation to Apply for public or private organisations interested in establishing new or enhanced Regional Cancer Centres around the nation. Joint private and public ventures may also be considered. Applicants must be able to demonstrate they have the capacity to support and maintain a viable and sustainable regional cancer centre, including addressing workforce needs and recurrent operational costs. Applicants must also show how the proposed centre will align with state

and territory cancer services plans, be part of a collaborative network of cancer services and have appropriate referral pathways.

The Centres will help close the gap in cancer outcomes between city and country by improving access and support for cancer patients in rural, regional and remote Australia. The Centres will also consider the needs of Indigenous Australians and people experiencing socio-economic disadvantage.

The closing date for organisations wishing to apply for Regional Cancer Centre funding is Friday 8 January 2010. The application guidelines, funding application form and supporting documentation can be obtained by registering at the Department of Health and Ageing website <http://www.health.gov.au/tenders>

+++++

Join friends in 2010

2010 is shaping up to be another interesting and important year for health in rural and remote areas. We are writing to encourage you to join or renew your membership of friends of the Alliance for another year. The cost of membership is unchanged: \$44 (including GST) for an individual, \$165 for an organisation of less than 50 people, and \$330 for a large organisation.

On joining you will receive a friends membership pack including a certificate, the Rural and Remote Health Papers CD, lapel pin, fact sheets and the latest annual report. A membership form can also be found on the friends page of the Alliance website at <http://nrha.ruralhealth.org.au/friends/?IntCatId=4>

The NRHA values the input of friends and finds its advice and contributions invaluable to the work of the Alliance. We look forward to working with you again in 2010.

+++++

RAMUS Scholarships now open

Applications are now open for the Rural Australia Medical Undergraduate Scholarships (RAMUS) Scheme, funded by the Australian Government and designed to encourage medical students with a rural background to pursue a medical career in rural, regional or remote Australia.

Successful applicants will receive un-bonded scholarships worth \$10,000 a year while completing a standard medical degree at their chosen university. The RAMUS Scheme is open to medical students from rural and remote areas, with demonstrated financial need being one of the criteria for ranking those who apply.

"The RAMUS Scheme supports a total of 550 ongoing scholarships and up to 120 new scholarship places are available in 2010. Applications must be submitted by 5pm on 18 January 2010," said RAMUS Manager, Susan Magnay.

The RAMUS page of the Alliance website has all the details - see <http://nrha.ruralhealth.org.au/scholarships/?IntCatId=7>

+++++

NSW Regional Dentistry Scholarship

The NSW Regional Dentistry Scholarship aims to support a student with strong links to regional New South Wales to train for a professional dental career. The scholarship will be awarded annually to a student commencing dentistry studies to help offset their costs in establishing themselves in their course.

Applications for 2010 are now open. Applications must be submitted by 24 February 2010. Application form available at <http://nrha.ruralhealth.org.au/otherscholarships/docs/NSW-RDS%20Application%20Form.doc>

Australian Farm Institute-Research report- Essential services in urban and regional Australia

Newly released research has for the first time quantified the extra costs faced by Australia's non-metropolitan residents in accessing essential government services, and highlighted the need to find better ways to deliver essential services in regional Australia.

The research, commissioned by the Australian Farm Institute and carried out by the National Institute of Industry and Economic Research (NIEIR), used census and other objective data to calculate the costs faced by all Australian residents in accessing essential services such as doctors, hospitals, schools, TAFE colleges and universities. These costs were then compared between metropolitan, urban and rural residents.

The research showed that:

- * on average, it costs rural residents five times as much to access essential services as it does metropolitan residents
- * the biggest access cost disadvantages faced by rural residents are for hospitals, residential care services, secondary schools, TAFE colleges and universities
- * the services for which there is least access cost disadvantage for rural residents are pharmacies and Centrelink centres and agencies.

The research report: Essential Services in Urban and Regional Australia - a Quantitative Comparison, is available for purchase at http://farminstitute.org.au/CampaignProcess.aspx?A=Link&VID=3177391&KID=72441&LID=253455&O=http%3a%2f%2ffarminstitute.org.au%2f_catalog_31033%2fResearch_Report_S

AIHW REPORTS

OECD says 'smoking down, but obesity up' for Australians

The proportion of Australians who smoke has more than halved in the past 20 years, while the proportion of obese Australians has almost tripled, according to a report released by the Organisation for Economic Cooperation and Development (OECD). The OECD's fifth biennial report *Health at a Glance 2009 - OECD Indicators* compares key health data across its 30 member countries. Australian data for the report were supplied by the Australian Institute of Health and Welfare (AIHW).

<http://www.aihw.gov.au/mediacentre/2009/mr20091209.cfm>

Long road ahead to cut risks for cardiovascular disease, diabetes, chronic kidney disease
A new report released by the Australian Institute of Health and Welfare (AIHW) shows that while a lot is being done to reduce the risk of developing cardiovascular disease, diabetes and chronic kidney disease, significant levels of risk still remain. According to the report, *Prevention of cardiovascular disease, diabetes and chronic kidney disease: targeting risk factors*, cardiovascular disease (CVD), diabetes and chronic kidney disease (CKD) account for around a quarter of the burden of disease and just under two-thirds of all deaths in Australia. Indigenous Australians and people from lower socioeconomic groups are particularly affected.

Caesarean rate stabilises as baby boom continues

The rate of women undergoing caesarean section has stabilised for the first time in more than ten years according to a report "Australia's mothers and babies 2007" from the AIHW. The report also shows more women are having babies and more are delaying having children until

later in life. The baby boom continued with over 12,000 more births in 2007 than in 2006 and 14% more than in 2004. The perinatal death rate was 10.3 per 1,000 births and fetal and neonatal deaths were 7.4 per 1,000 births and 2.9 per 1,000 live births respectively. Young maternal age, maternal Indigenous status and multiple births were associated with higher rates of perinatal deaths.

NT child health checks-many children benefit, some still need follow-up services

Many children have benefited from health services following health checks in the Northern Territory, but not all children have received follow-up services for their health problems, according to a report released by the Australian Institute of Health and Welfare "*Progress of the Northern Territory Emergency Response Child Health Check Initiative: final report on results from the Child Health Check and follow-up data collections*". The shows that more than 10,000 Aboriginal and Torres Strait Islander children aged between 0 and 15 years received a Child Health Check (CHC) under the Northern Territory Emergency Response (NTER) between July 2007 and June 2009.

Indigenous medical students urged to apply for AMA scholarship

AMA President Dr Andrew Pesce today urged Indigenous medical students to apply for the 2010 AMA Indigenous Peoples' Medical Scholarship. The scholarship was established in 1995 to help increase the number of Indigenous doctors in Australia.

"The AMA believes that an essential part of closing the gap in Indigenous health is to build an adequate workforce for Indigenous health. This importantly includes doctors and health professionals who are Indigenous," Dr Pesce said. "There is evidence that there is a greater chance of improved health outcomes when Indigenous people are treated by Indigenous doctors and health workers.

Rural Health on Croakey - the Crikey Health Blog

Bushfire season: lessons from Victoria for health and health services
December 8, 2009 - 9:49 am, by [Croakey](#)

With the bushfire threat high on many peoples' minds (including Croakey's), it is timely to consider some of the health issues involved. One of many lessons from the Victorian experience is that health services, especially in areas under-served at the best of times, require extra support for the long-term after such a disaster.

From: Elisia Dowling edowling@parks.vic.gov.au
Subject: International *Healthy Parks Healthy People Congress*

With the increasing recognition of the value of nature to human health and wellbeing worldwide, Parks Victoria will host the inaugural International *Healthy Parks Healthy People Congress* at the new Melbourne Convention and Exhibition Centre, Australia from 11-16 April 2010.

This will be a unique opportunity to bring together delegates from all relevant sectors (i.e. planning, community development, physical and mental health, tourism, climate change, education, recreation, ecology and park management) to explore how we can take better advantage of the way nature significantly contributes to our wellbeing and broader societal benefits.

We are seeking proposals under the following themes: Healthy Communities, HealthyPlaceName> Parks, Healthy Participation, Healthy People and subthemes.

In addition to the partners displayed on the website, the support of the World Health Organisation, United Nations World Tourism Organisation, US Federal Centers for Disease Control & Prevention and the Australian Federal Government Department of Health & Ageing is being sought.

Healing Our Spirit 2010

Aboriginal and Torres Strait Islander health workers and researchers are advised to start planning now for Healing Our Spirit Worldwide The Sixth Gathering, which is due to take place on the island of Honolulu in Hawaii from 3 to 10 September 2010. The goal of Healing Our Spirit Worldwide (HOSW) is to celebrate the diverse and unique cultural strengths, knowledge and talents of Indigenous peoples around the world, with a particular focus on successes, best practices and common issues in health, healing and addictions.

The Cooperative Research Centre for Aboriginal Health is a proud supporter of and committed participant in the gathering, which will be hosted by native Hawaiian healthcare organisation Papa Ola Lōkahi

Rural Medicine Australia 2010

Scientific Forum: Call for abstracts

The 2010 national conference and scientific forum of ACRRM and RDAA will be in Perth in October. The scientific forum is a significant part of the conference and is held every second year. There will be a call for abstracts early in the new year. Almost 300 people attended Rural Medicine Australia 2009.

Media Release

9 December 2009

Delays in reform 'blueprint' put rural health at risk

People in rural and remote areas are concerned that specific improvements in rural and remote health might be put on hold pending agreement by the Commonwealth and States about their respective roles and responsibilities in the wider reform picture.

"It is vital that initiatives already agreed as important for better rural and remote health are not held up by governments failure to agree on a "blueprint" for major health reform," said Dr

Jenny May, Chair of the National Rural Health Alliance.

It is also of concern that such a blueprint continues to be characterised in the media as "a Commonwealth takeover" - a phrase that oversimplifies the issues and seems to run counter to the need for regional and local decision making.

The Minister has referred to the health system reaching "a tipping point". The Alliance believes that point has already been reached in rural and remote areas. This makes it imperative that further improvements targeted to rural and remote areas be included in the Federal Budget in May 2010.

"There are many necessary changes that can be implemented now that are not dependent on overall Commonwealth-State agreement and these should not be held up while a national reform blueprint is being developed," Dr May said.

"These should include extra investment in attracting professionals from all disciplines to the rural and remote health workforce, as well as supporting and retaining those already there. The Commonwealth must also take the lead and invest with the States and Territories in improving Patients? Assisted Travel Schemes. Work to quantify the total rural and remote health deficit should also begin in earnest as a basis for moving soon to make equivalence payments to under-serviced areas."

A welcome measure announced at this week's COAG meeting in Brisbane was the promise to further develop a national e-health system, with commitment to the introduction of national health care identifiers in 2010 - prerequisites for a patient-controlled electronic health record.

"Electronic health records are especially vital for people from rural and remote areas because such people are required to seek health services both locally and in other centres. This initiative must remain on track," said Dr May. 2

While the promise of additional resources from the Commonwealth for elective surgery is welcome, the main concern in rural areas is about potential closure of smaller hospitals. Rural people are entitled to expect specific investment in hospitals in medium-sized towns, not just to provide local services but also so they can act as outreach service hubs to smaller centres for integrated acute, primary and aged care.

"People in rural and remote areas are looking forward to the benefits that will accrue from the national reform blueprint," Dr May said. "But at the same time, much of what needs to be done to improve rural and remote health services is plain to all and should not be postponed."
